

# Technical Standards and Acts

## Category Description

As an Engineering professional, you know how quickly technology changes. Perhaps more than most, you feel the impact of those changes on how you do your job and how you navigate your career. It's important for you to stay up to date both for your career and as a priority for maintaining public safety. Employers also know that honing and diversifying the skills of their workforce has a direct impact on the bottom line.

Given the variety and complexity in the engineering profession, where can you go to keep up with it all? OSPE's Engineering Academy (OEA) is positioned to help. We partner with industry experts and innovators to monitor the changing landscape and bring OSPE members learning and development opportunities in the following areas:

## Courses

### Acts

- Electrical Safety Codes

### Codes

- Building
- Standards
- Occupational Health & Safety 100 (E-learning)
